Installation

1. Attach the template to the right rear shelf base.
2. Use a center-punch to mark according to the template.

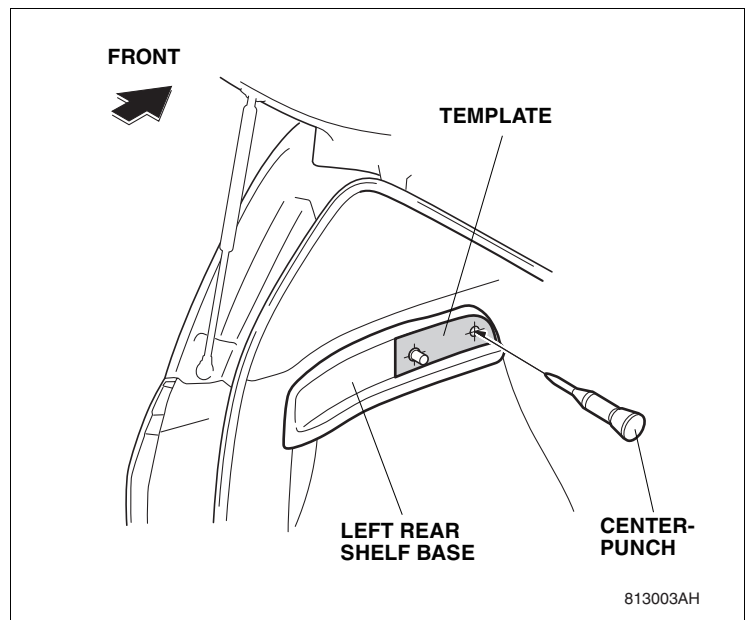

813001AH

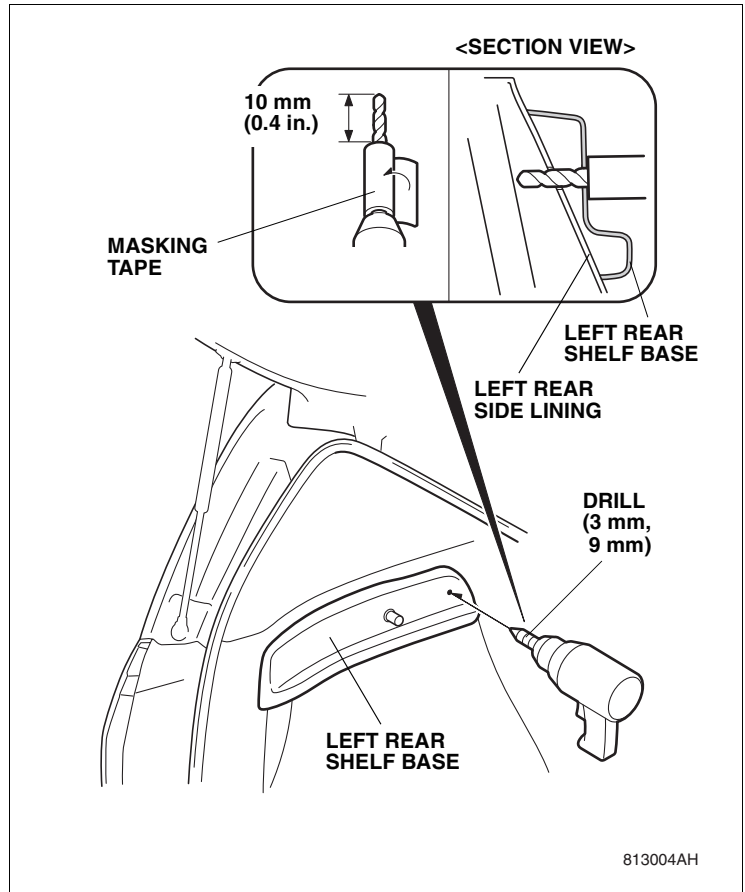

3. Wrap the masking tape around the drill tip to prevent too deep penetration.
4. Remove the template. Wearing an eye protection, drill the marked position of the right rear shelf base using a 3 mm bit first, then with a 9 mm bit.

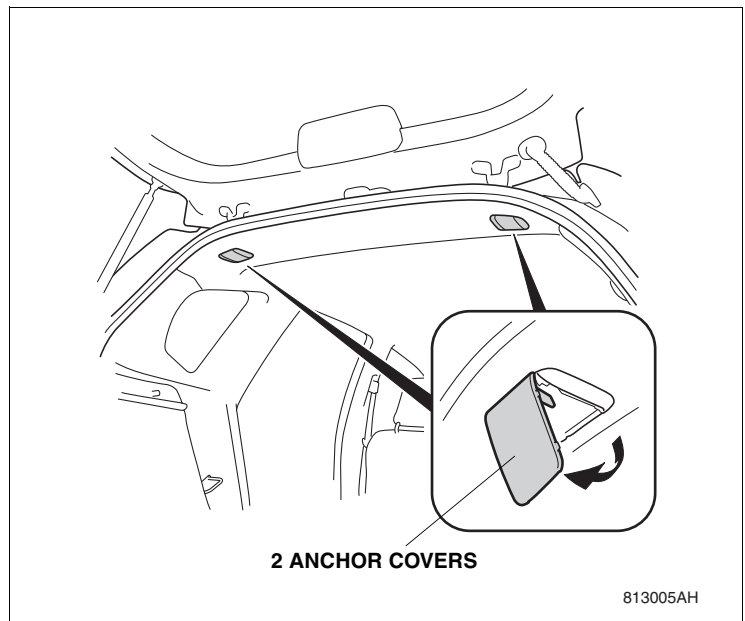

5. Reverse the template and attach it to the left rear shelf base.
6. Use a center-punch to mark according to the template.

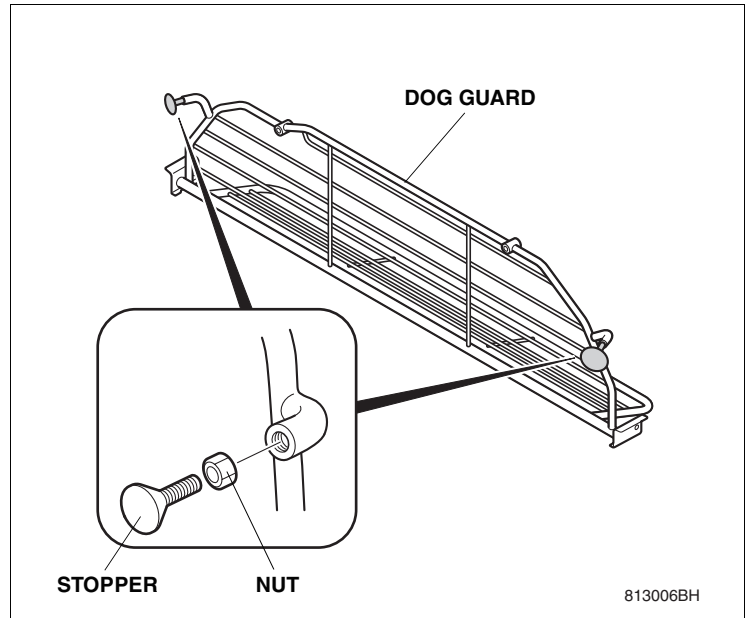

7. Wrap the masking tape around the drill tip to prevent too deep penetration.
8. Remove the template. Wearing an eye protection, drill the marked position of the left rear shelf base through the left rear shelf base and the left rear side lining using a 3 mm bit first, then with a 9 mm bit.

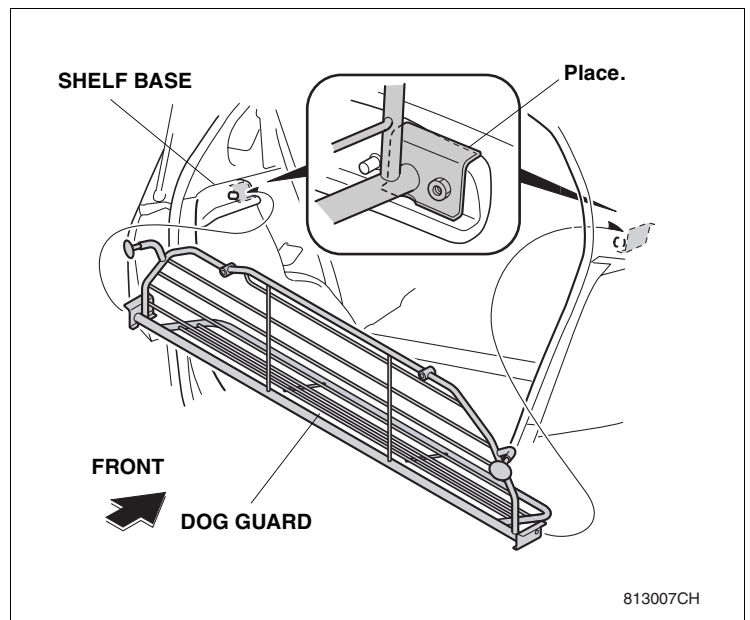

9. Open the two anchor covers.

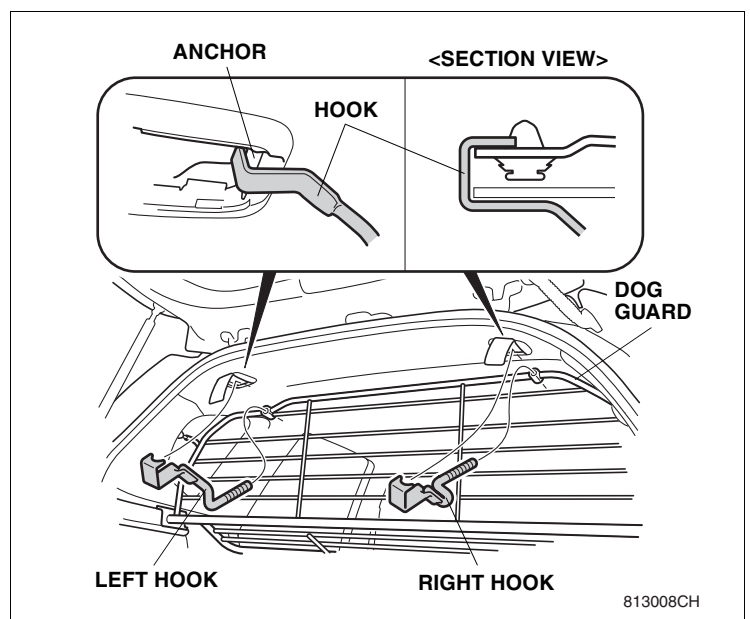

10. Install two nuts and two stoppers to the dog guard.

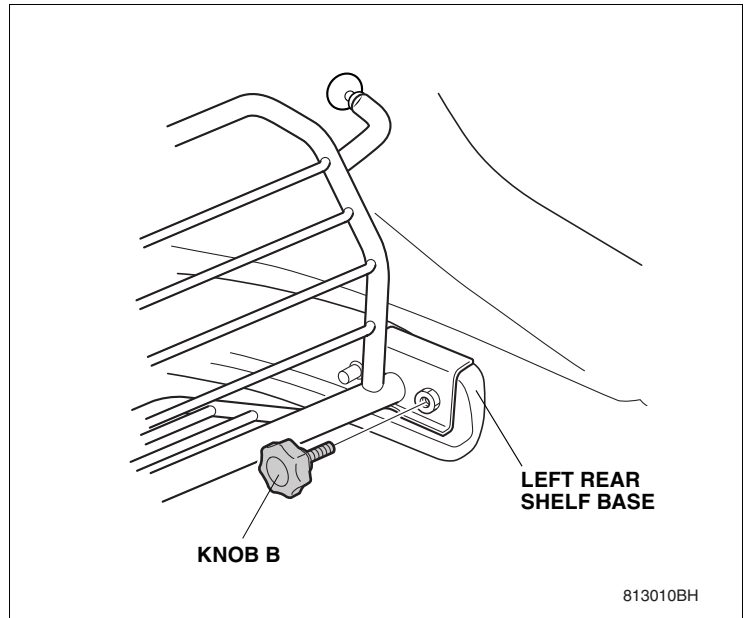

11. Place the dog guard on the shelf base.
- Be careful not to damage the vehicle.

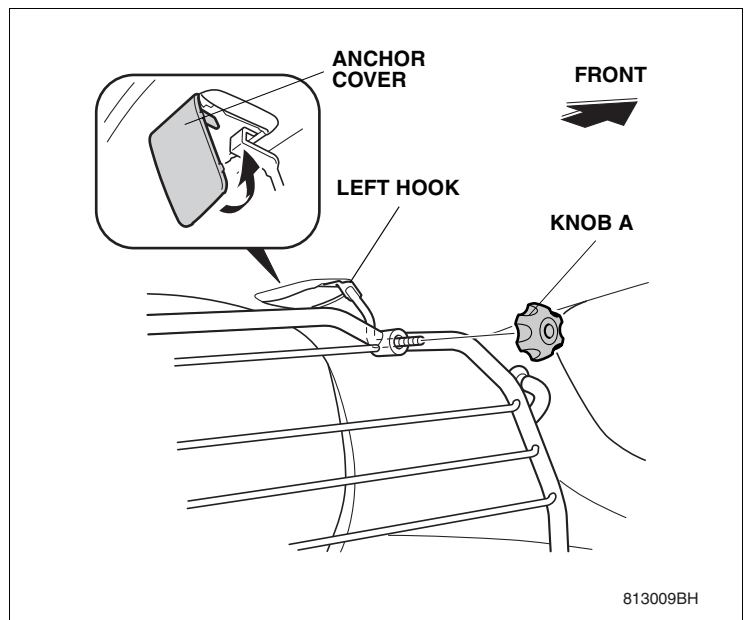

12. Engage left and right hook with the anchors and secure them to the dog guard.
- Check the distinguishing mark on either side of the hook (right/left).

13. Secure the dog guard with knob B to the left rear shelf base.
 - To prevent damaging the left rear shelf base, fix knob B in accordance with the attachment hole of the left rear shelf base.
 - Be careful not to damage the left rear shelf base.
14. Perform the same work also on the opposite side.

15. Secure left hook with knob A.
16. Close the anchor cover.
17. Perform the same work also on the opposite side.

18. Place the stopper against the rear side garnish and secure it with the nut.
19. Perform the same work also on the opposite side.
 - Confirm that all parts have been tightened securely.
