

# Hub caps HERMES

**3V0 071 456**

ŠKODA Superb (3V)

**Material:** Plastic

**Colour:** Silver

## Improved appearance | Protection | Resilience and toughness

For ŠKODA Superb with steel rims, the ŠKODA Genuine Accessories portfolio offers hub caps that provide a car with "mundane wheels" with a significantly **more elegant appearance**. The Hermes plastic hub caps even look like there are actual cast wheels on the car. In addition to the aesthetics, they also **provide protection**. They **protect** the steel rims **from various wind conditions** and mechanical damage, along with providing sufficient air inlet for brake cooling. The hub caps are made of a resistant silver plastic that features high **resilience** and **toughness**. The resistant and non-peeling paint also protects the surface of the hub caps themselves and makes them easy to clean. Fitting the cap on the wheel is very simple. Only when using safety bolts, the safety bolts have to be used at the rear side of the hub cap marked with the safety bolt symbol. When using snow chains, it is recommended that you take the hub caps off of the steel rims.

**Wheel dimensions:** 6,5J x 16" ET 41

**Fitting time:** 20 TU

**Contents of the kit:** Hub caps (4pcs), installation manual

**Maintenance:** Standard soap-based cleaning agents suitable for plastic. Don't use abrasive cleaning agents or solvents.

**Warranty:** 24 months

**Weight:** 2 kg
