

Cooling box

000 065 400E

Universal

Material: Plastic

Comfort on the road | Refreshment | Variability

Car cooling box is due to the possibility of its use one of the **essential accessories** of the ŠKODA cars. It is an ideal partner **for long drives or trips** as well as for everyday buying of food that needs to be kept cool. The cool box that ensures **fast and even cooling** always provides drinks, fruit or other food that will refresh you in the hot summer days. The cool box can be safely attach to the back seat using the safety belt or it can be put into the car luggage room. The cool box is equipped with a rugged handle that allows **to move** the cool box **as needed**.

Fitting time: 20 TU

Dimensions: 420 x 300 x 420 mm

Contents of the kit: Cooling box - inner volume 20 l, installation and user manual

Power supply: 12 V or 220 to 240 V sockets; 2 power supply modes: **ECO** - The cooling box consumes less power; **MAX** - The cooling box achieves the maximum cooling power

Placement: Back seat of the car or the luggage compartment if it is equipped with a 12 V socket. If the cooling box is placed in the luggage compartment it must be secured against movements e.g. using an universal fixing element.

Maintenance: Standard soap-based cleaning agents. Wipe dry after each use.

Warranty: 24 months

Weight: 4.2 kg
