Design | Quality | Durability

A part of the ŠKODA Genuine Accessories portfolio, the **Cassiopeia** alloy wheels were designed specifically for Superb. These 18-inch wheels make your car **shine** in the same way a star constellation illuminates the night sky. Their **Black Gloss** finish is especially noteworthy on cars with light-coloured bodywork (e.g. white). The favourable mass distribution results in reduction of inertial forces in the rotating wheel, which means that apart from its aesthetic function, the Cassiopeia ten-stoke wheels also **benefit the driving properties**. The rims are cast as one piece using aluminium and several other light metals. In the final stage, they are coated with a layer of extremely hard, heat-resistant paint. Prior to mounting the wheels, make sure the Cassiopeia wheels actually are suitable for your Superb.
